Stafford Mums

Our 56th Annual List

STAFFORD CONSERVATORIES, Inc.
STAFFORD SPRINGS, CONN.
Overland 4-2751

CALL ORDERS

Many Customers prefer to call for their cuttings rather than have them shipped. **ORDERS PLACED IN ADVANCE** for STAFFORD MUMS can be called for at Stafford Springs on the day of the week most convenient to you. However, **THOSE WISHING TO SELECT ORDERS ON ARRIVAL MUST CALL ON THURSDAY, FRIDAY OR SATURDAY UNTIL NOON.** This policy is necessary due to the fact that shipments by express, etc., must be made early in the week.

METHOD OF SHIPMENT

All shipments F.O.B. Stafford Springs, Conn.

All orders shipped by EXPRESS unless requested otherwise, or a more convenient or lower cost service is available.

24 HOUR DELIVERY SERVICE

In a constant effort to have cuttings reach you promptly and in the best possible condition, we have made arrangements to provide a 24 hour delivery service direct to your door at very low rates.

The state of CONNECTICUT will be covered completely.

Many areas in states of MASSACHUSETTS and RHODE ISLAND will be covered. This service will be a direct, no transfer delivery at a considerable saving over Air Freight or Railway Express rates.

For those who may be outside these delivery areas, we have established pick up stations thru this service.

To find out the availability of these services kindly call or write us.

PARCEL POST SHIPMENTS—

Sufficient postage should be included when cash accompanies order.

On Credit Accounts actual postage is added to the invoice.

DELAYED OR DAMAGED SHIPMENTS

DO NOT REFUSE OR RETURN SHIPMENT. Have delivery Agent inspect and sign for the extent and nature of the damage.

YOU SHOULD FILE CLAIM FOR LOSS. Transportation charges are usually refunded when claim is paid.

Our responsibility ceases when we make delivery of cuttings in good condition to the Transportation Company.

Notify us promptly and we will do our best to supply such varieties as you wish replaced. Your claim will reimburse you for the damaged shipment.

Should you have difficulty in collecting legitimate claims we will endeavor to help you if so requested.

TERMS OF SALE

PRICES QUOTED IN THIS LIST ARE WHOLESALE ONLY

F.O.B. Stafford Springs, Conn.

When ordering please enclose Billhead or Letterhead to establish identity for trade purposes.

MINIMUM ORDER 50 R. C. OF A VARIETY

Cancellations or changes on early booked orders must be received at least 30 days before shipping.

PARTIES OUTSIDE THE TRADE

ADD 25% TO THE PRICES QUOTED IN THIS CATALOGUE.

If less than 50 R. C. of a variety are wanted write for prices.

TERMS OF PAYMENT

CASH UNLESS CREDIT IS ESTABLISHED WITH US.

Cash and Early Order Discount. See Schedule Page 2.

DISCLAIMER

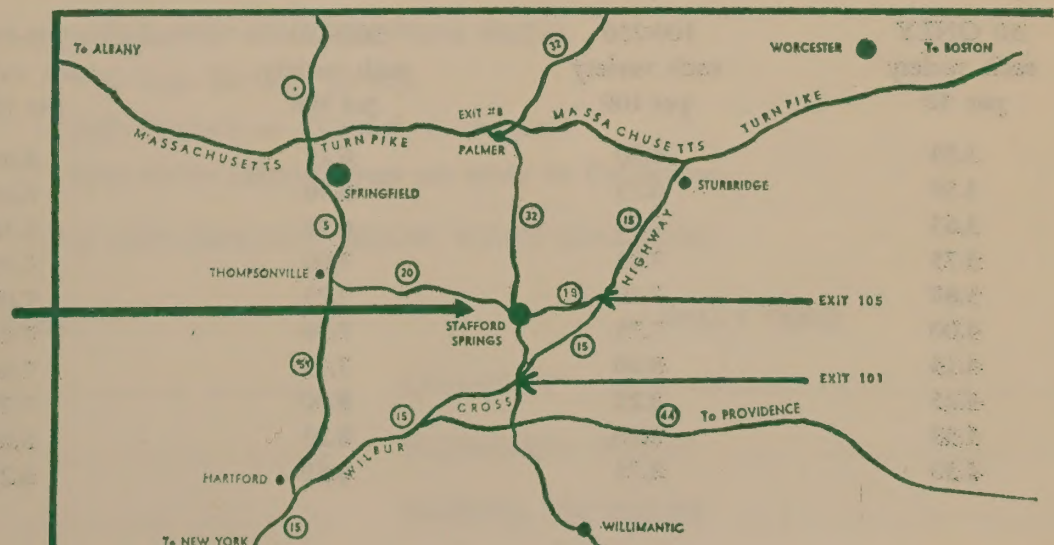

It is our policy and constant effort to secure and provide clean and reliable stock. We exercise every care to deliver to our customers the best stock available.

We give no warranty, expressed or implied, as to the productiveness of any stock, as we exercise no control over the conditions under which the stock is planted and grown by the purchaser. Therefore, we cannot be held responsible for the results produced. Our liability in any instance is limited to the purchase price of the stock in question.

We hold ourselves responsible for miscounts or misdirected shipments and will gladly make adjustments or replacements should they occur. These must be reported promptly. Please return packing sheets in such cases.

Complaints of any nature on stock supplied should be reported as soon as noticed and before crop matures or is disposed of.

*Visitors are always
welcomed at the
Stafford Conservatories
Stafford Springs, Conn.*

DISCOUNTS EFFECTIVE JANUARY 1, 1962

EARLY ORDER DISCOUNTS

The number of weeks an order is received at Stafford in advance of shipping date.

1 - 5 weeks	5%
6 - 11 weeks	7%
12 - 17 weeks	10%
18 or more weeks	12%

The Early Order Discount is available when invoice is paid within 30 days after date of invoice.

QUANTITY DISCOUNT

This discount applies to users of 5,000 or more cuttings during the calendar year.

5,000	5%
10,000	10%
25,000	15%
40,000	20%

Discount credited as shipments reach discount quota and is retroactive to cover all shipments made during the calendar year. Quantity discount available only if paid within 90 days from date of invoice.

Discount period on Changes or Additions to earlier booked orders effective from date of change.

PRICE SCHEDULE — PER SHIPMENT

MINIMUM ORDER 50 ROOTED CUTTINGS OF A VARIETY

50 ONLY each variety per 50	100-250 each variety per 100	300-450 each variety per 100	500-950 each variety per 100	1000 up each variety per 100

CONTRACT PRICES

CONTRACT PRICES are available to year-round growers of Cut Flowers or Pot Mums.

We will set up program with you and determine a fixed price for Rooted Cuttings for the program. This enables you, the grower, to select varieties for different periods without having to absorb higher planting costs at various times. Under contract prices the cost of cuttings remain fixed throughout the program. Contract pricing is available to growers, depending on frequency and volume of shipments. We will be glad to provide further information if you are interested in this plan.

COLLECTIONS — OUR SELECTION OFFER

We will select Cuttings to meet your seasonal requirements at the prices below. Varieties will be selected by us from surplus stock at the time of shipment and cannot be restricted to other than Standards or Spray Types, Color and Flowering Period.

MINIMUM SHIPMENT AT THIS PRICE 300 R. C.

Quantities under 300 billed at list price of variety supplied.

300 — 950
\$6.50 per 100

1,000 and up
\$6.00 per 100

Orders calling for 1000 or more and restricted to 50 of a Variety billed at \$6.50 per 100.

DISCOUNTS ON COLLECTION PRICES

5% Cash Discount 30 days.

10% Discount on 10,000 R. C. or more

Early Order Discount does not apply on Collections.

GIVE INFORMATION BELOW WHEN ORDERING.

GROWING 'MUMS FROM START TO FINISH

The first step if you are not experienced in growing 'MUMS is to acquaint yourself with their habits and needs, then be prepared to take care of them as they progress in growth. We give below basic details which we find are most widely used among reputable growers in this section of the country. The grower will soon learn by his own experience how to modify or elaborate on these instructions.

The successful grower will figure out his planting schedule, many months or a year in advance. This not only helps you but the supplier of young stock to have sufficient stock for the particular planting date. Have the space ready for them and plant the cuttings on arrival or as soon as possible. The cuttings you receive will be grown under modern conditions, from the cleanest stock available, and as free from disease and premature buds as modern methods can produce. Failure to carry out and properly execute each step at the correct time will show its effect in the growth and quality of your finished product.

SOIL — Preparation and Fertilizing

'Mums grow well in most soils. Moderately porous soil is best. This can be made by the addition of peat or manure but knowing the behavior and nutrient content of your own particular soil is important. Soil tests will give you this information and if you cannot do this yourself, your Agricultural College or Experiment Station will be glad to do it for you.

Before sterilizing or planting, add lime and superphosphate as needed. (In case of steam sterilizing these materials should be added before sterilizing.) Use about 3-5 lbs. to 100 sq. ft. of bench space. Nitrogen and Potash can be added after the plants have become established and start to grow. These elements can be applied in dry or liquid form according to the growers preference. A complete dry fertilizer such as 5-8-7 or 5-10-5 or any of the water soluble fertilizers can be used.

SAFE NUTRIENT RANGE FOR ESTABLISHED PLANTS

Nitrogen	25-50 ppm
Phosphorous	2½-5 ppm
Potassium	20-40 ppm

These readings may be lower on fast growing plants and still be sufficient. Also if you are using constant feed application, they will run on a lower average.

SOIL STERILIZATION

Sterilizing the planting soil is vitally important in destroying such diseases as Verticillium wilt, nematodes, and other destructive organisms carried in the soil. To insure a quality crop under successive flowering it is advisable to sterilize at least once a year or for every other crop. The cuttings supplied, while free of diseases when received will pick up various diseases from the soil they are planted in, unless it has been properly and thoroughly sterilized.

Before sterilizing be sure to loosen all soil thoroughly as steam or chemicals cannot penetrate hard packed soil satisfactorily.

In addition to producing a better crop sterilizing also proves to be economical in allowing reuse of valuable soils and humus, and saving on costly labor involved in changing soils and weeding.

Sterilizing can be done with either Steam or Chemicals. With steam sterilizing, which is most practical, it is necessary first that the soil be moist before sterilizing and that a temperature of 180 degrees fahrenheit be maintained throughout the entire soil mass for a period of not less than one half hour.

Chemical sterilizing such as Vapan or Chloropicrin can be used where steam is not available and circumstances will permit it. The soil should be at least 60 degrees fahrenheit and the greenhouse being treated should have no other living plants in it, as chemical reactions will destroy them. There are a number of chemicals suitable for this work, but whatever is used, follow the manufacturer's instructions carefully.

HIGH SALTS DAMAGE FOLLOWS STERILIZING

When using old soils, or soil used for a previous crop, it should first be sterilized. Then watch for high soluble salts which may be present 2 weeks after sterilization. These salts cause plenty of trouble to 'Mums. They are the residue of fertilizers used on the previous crop, and will kill the roots of young cuttings or seedlings, or result in a poor sickly crop. These salts can be washed out of the soil by HEAVY LEACHING with water, giving two or three applications in succession. High salts do not necessarily mean high nutrient levels. You can have high salt and low nutrient levels. After you get rid of the high salts you should continue with a regular feeding program, as you wash out all your fertilizer as well as the salts. The use of liquid or water soluble fertilizers also helps to reduce salt hazard. GOOD DRAINAGE IN BENCHES IS ESSENTIAL.

PLANTING AND SPACING

The time of planting will be determined by the blooming date, or response group, quality and size of flowers, and pinching if desired. For normal flowering allow about three weeks from planting to pinching. Normal pinch date is given with each response group listed in the general catalogue of varieties. For the off season program refer to schedule outlined in this catalogue for planting and pinching data.

Plant cuttings shallow, not over one inch deep and directly to permanent benches if possible, soon as the cuttings are received. Keep roots of the cuttings protected at all times while planting. Exposure, especially to hot sun and wind, will destroy the root action in a few seconds.

If space is not ready when cuttings arrive they should be potted or banded to keep them soft and growing. Here again, careful attention should be given to see they are put in fresh or sterilized soil, so as to keep them free of verticillium wilt and other soilborne diseases. Be sure not to let them stay too long in this crowded condition. Shading newly planted stock on very hot sunny days for the first couple of days will help considerably, as well as, frequent spraying with water over the tops of the cuttings. They should not be allowed to wilt.

Spacing will depend on the quality desired as well as the time of year and number of pinches. Standards are generally spaced 7 x 8 or 8 x 8, grown two stems to the plant. Some growers allow three flowers to come on the outside rows where light is more abundant. For single stem culture 6 x 5 or 6 x 6 is ample. Pompon spacing depends on method of pinching and varieties. Some varieties have much heavier foliage than others and require more space. For the one pinch method 6 x 8 or 7 x 8 is fairly standard. For 2 pinch method 8 x 9 or 9 x 9 will be sufficient. For single stem production 4 x 6 or 4 x 7 is about right. The general rule followed is to give each flowering shoot approximately 20 sq. in. of space.

WATERING

Chrysanthemums require lots of water, especially when grown on raised benches and if you have a good porous, well drained soil. Water heavily after planting and then spray or sprinkle plants for a few days until they have taken hold. Do not let them wilt if possible. Once the foliage gets heavy do not water overhead and by no means allow the foliage to be wet overnight. Keep the foliage dry and the soil moist.

PINCHING

Pinching means the stopping of the upright growth of the plants by cutting or breaking off the growing tip of the plant stem. It is done to increase the number of stems per plant, to control type of bud formation and to keep plants shorter in growth. This will cause a number of breaks or shoots to appear. The plants should be pinched soon after the cutting takes hold and starts to grow freely. Usually only the tip of the stem is removed when under fast modern production. Do not pinch down into the hard stem. Thinning the breaks down to about 3 shoots to the plant on pompon varieties and 2 shoots on the Standards usually give best results. Normal pinch dates are given in the general listing of varieties. For the off season cut flower or pot plant program refer to pinch dates in the desired schedule.

LIGHT AND TEMPERATURE

Except for the first few days when the young cuttings are planted or potted, Chrysanthemums require all the light they can get. If shade is on the roof from summer it is best to remove it at least by the 1st of September. Chrysanthemums are no longer considered a cool crop. A minimum of 50 degrees or better still 55 to 60 degrees night temperature is considered best for all stages of growth for normal flowering. This is particularly important during bud initiation as too low a temperature will prevent buds from forming properly and likely result in some blind growth. Temperatures too high, 90 degrees or over, which can occur under black cloth, is also bad as it tends not only to slow down the crop but fades the pink, red and bronze shades.

INSECTS — PREVENTION AND CONTROL

It is very important to keep the stock clean and free of injurious insects. The best way to insure this is to start spraying the plants about two weeks after planting and to spray at intervals of every two or three weeks until color shows. You will find it easier to keep them clean than to wait until infestation shows up and causes damage, then have the task of trying to get the best of it.

A good general purpose spray for Chrysanthemums:

Material	Amount to make		
Water	100 Gal.	25 Gal.	3 Gal.
DDT 50% wettable powder (during Summer and Early Fall).	1 lb.	1/4 lb.	1 1/2 tbsp.
Malathion 25% wettable powder	2 1/2 lbs.	10 oz.	4 tbsp.
Parzate, or Fermate	1 1/2 lbs.	5 oz.	2 tbsp.
DuPont Spreader sticker - or other spreading agent such as Dreft, may also be used	6 oz.	2 tbsp.	1 tsp.

Mixing Procedure — Put all dry ingredients into a can or pail. Add small amount of water, stir to make a thin paste. Put a small portion of the water to be used into the spray tank. Add above mixture slowly, stirring constantly, (run agitator while adding the mixed solution). Add balance of water and be sure it is well mixed before using.

DISBUDDING

It is extremely important that you take the time to select the flowering buds on Standards as soon as they appear and are sizeable enough to remove. If the crop was planted and pinched on or near the recommended dates, flower the first bud that appears. In other words, as soon as a bud of any kind appears, remove all side shoots and let the center bud flower.

SUPPORTING THE PLANTS

To grow good flowers with good stems it is essential to keep the plants properly supported at all times.

The wires and cross string method is least work, most economical and practical. Start supporting the plants soon as they are established and either add additional layers of wires and cross strings or move the first layer up about every 10 to 15 days depending on growth.

TO PREVENT PREMATURE BUDS

ALL Mum cuttings including Garden Varieties, need additional light, according to their response group, during certain times of the year so as to prevent premature buds, when grown in temperatures over 50 degrees. See "Additional Lighting Schedule" and "Year 'Round Lighting and Shading Schedule" on page 22.

THE CONTROL OF PESTS AND DISEASES

EFFECTING CHRYSANTHEMUMS

Our own controls for most common Chrysanthemum Pests and Foliar Diseases are: D.D.T. as a spray or dust, Systox in soil as a systemic, Malathion as a spray, Parzate as a fungicide, alternating Aramite, Aramite and Lindane, and Parathion as Aerosol bombs. There are many other controls that are equally effective which can be used.

PESTS	CONTROLS
Red Spider	Malathion or Parathion as a spray. Systox as a systemic in soil. Aramite or Parathion Aerosol bombs. Alternate bombs for best results. For Resistant Spider Alternate Dithio and Chlorobenzilate bombs.
Thrips	Lindane, Malathion bomb or spray. D. D. T. dust or spray.
Aphids	Malathion or Parathion bomb or spray. Lindane or Thiodan as a spray. Parathion pressure fumigators also useful for small areas, especially when aphids attack open flowers.
Leaf Roller — Midge Tarnish Plant Bug or Cinch Bug	Parathion bomb, spray or dust. D. D. T. spray or dust.
Mite: Glazed brown appearance on underside of foliage.	Endrin spray very effective.
Foliar Nematode: Tiny Eelworms inside leaves causing brown blotches.	Parathion spray. Systox in soil 3 to 4 weeks after planting. O M P A Bomb.
Septoria Leaf Blight Black Spot	Regular spraying with either Parzate, Fermate or Captan. Keep houses clean. Ventilate freely.
Verticillium Wilt	Outer edges of leaves turn yellow. General wilting of leaves usually starting at bottom and working up. Little can be done for current crop. Sterilize Soil and use Verticillum free cuttings before replanting.
Botrytis or Petal Rot	Dust or spray weekly with Parzate. Keep air circulating, ventilate and heat. Keep humidity down. Portable fan installation very effective. C. M. 19 as a spray, as crop nears maturity (Eliminates Residue.)
Pythium Due to humid growing conditions. Deterioration of stems usually below soil line causing wilting of plants.	Remove and Destroy wilted or diseased plants. Air houses well. Allow plants to dry thoroughly between waterings. General cleanliness essential as disease is spread rapidly by hands and tools. Sterilize soil before reusing. Captan as drench — 1 to 1¼ lbs. 50% Wettable powder to 15 Gal. water per 100 sq. ft. of bench.
Bacterial Blight Wilting and discoloring of plant tips and foliage, usually from forcing plants into soft rapid growth, or during hot humid weather.	Precautions — same as for Pythium, described above. No recommended chemical treatment.
Rhizoctonia Cause and symptoms similar to Pythium, but produces cankerous and at times fungus growth above soil line.	Precautions — same as for Pythium. Treatment — Terraclor — 2¼ lbs. 75% wettable powder to 300 Gal. Water per 1000 sq. ft.
Mildew: White powdery growth on upper side of leaves.	Spray wettable Sulphur with spreader. Mildex as a spray. Keep well ventilated.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

8 WEEK VARIETIES (Pinch July 14)

WHITE PINK CHIEF Oct. 15 3.38
Intermediate pure white incurved. Responds well under high temperatures. Pink tinge when finished cool. Summer Shade programs and normal under glass.

SILVER SHEEN Oct. 20 3.50
Intermediate incurved, clear white. September shade and normal under glass.

9 WEEK VARIETIES (Pinch July 21)

MARBLEHEAD Oct. 25 3.88
Medium clear white incurved. Will support 4 and 5 stems per Plant with well shaped flower. Good for fast disbuds and summer flowering, June thru October.

WILSONS WHITE Nov. 1 4.13
Intermediate incurved, for pots only. Best flowered under higher light intensities April thru November.

QUEENS LACE Nov. 1 3.63
Reliable White Spider. Temperature tolerant Standard and Fast Disbud programs. Novel Pot Plant requiring tall treatment.

DONLOPE'S WHITE SPIDER Nov. 1 3.88
Large straight quilled ivory white spider characterized by durable flowers on strong stems. Best flowered April thru November.

10 WEEK VARIETIES (Pinch July 28)

GIANT BETSY ROSS Nov. 5 3.38
Large incurved flower that is still the best flower for high temperature periods when Indianapolis Varieties cannot be recommended. This is the Mum that is the largest and most reliable for mid-June to mid-September.

OREGON Nov. 5 3.50
Best white pot mum available for all periods. Perfect companion to the Delawares for convenient programming. Strong breaking action, when Short Treatment used, producing large white blooms that give maximum show for specimen Pot Mums.

#3 INDIANAPOLIS WHITE Nov. 5 3.38
Large Incurved White. Selection from Ind. White that does not quill under winter low light and temperature conditions. Noticeably larger than the Improved Ind. White, of whiter color, and superior in its form retention and depth of flower.

NIGHTINGALE Nov. 5 4.38
White Spider variety with a chartreuse green overcast. Offers the something different for retail trade.

#4 INDIANAPOLIS WHITE Nov. 5 4.25
Selection from #3 Ind. White that surpasses it in size but maintains same fine form. Not as tolerant of low temperatures for winter flowering as is the Imp. Ind. White, but can be grown where sufficient temperature can be maintained.

TOKYO Nov. 10 4.50
Large white spider that can be grown well the year round. Whiter and more graceful than Donlope's White Spider.

IMP. INDIANAPOLIS WHITE Nov. 5 3.38
Recommended for flowering December thru April. Reduces quilling and pinking during this period. Will withstand slightly lower temperature than Ind. White.

FRED SHOESMITH Nov. 12 3.50
Here is a large, incurved White standard that is consistently larger than the Indianapolis varieties and usually flowers about seven days later than they do in any Off Season program. Shoesmith varieties are most reliable when grown under pinched programs. Does not display winter quilling or pinking.

11 WEEK VARIETIES (Pinch Aug. 4)

MEFO Nov. 15 3.38
Large incurved ivory white standard. Very reliable 'Mum for January thru March in northern programs, where some find it better than the Indianapolis or Shoesmith varieties.

MARKETEER Nov. 18 3.75
Intermediate incurved. Best grown as pinched crop. May be used for pinched or single stem pots.

WHITE STANDARDS (Cont.)

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

12 WEEK VARIETIES (Pinch Aug. 11)

IMP. WHITE PETER JOHN Nov. 25 4.38
Large reflex. Clear white. This is a real improvement.

CHATTANOOGA Nov. 25 3.75
Large incurved clear White, for thanksgiving.

13 WEEK VARIETIES (Pinch Aug. 18)

SMITH'S LATE WHITE Dec. 13 3.88
Intermediate incurved, Ivory white. Best late white available. Can be held to late December if finished cool.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

DECEMBER GLORY Dec. 1 4.50
Intermediate perfectly incurved. White.

Modern business demands . . .

*A personal business relationship with
qualified specialists.*

These are yours at Stafford Conservatories

YELLOW STANDARDS

8 WEEK VARIETIES (Pinch July 14)

GOLD LODGE Oct. 15 4.25
Intermediate incurved, deep lemon yellow.

MRS. KIDDER Oct. 20 3.63
Intermediate incurved, deep lemon yellow.

BLAZING GOLD Oct. 23 3.88
Intermediate semi-incurved, deep golden yellow. Standard or fast disbud. Good for single stem or pinched spring pots.

9 WEEK VARIETIES (Pinch July 21)

LUYONA Oct. 25 3.50
Large deep yellow spider on strong rigid stem. Growing and flowering habits generally preferred to those of the Lace varieties. Good companion to Donlope's White Spider and Bunbu. Can be flowered at any time of year.

GOLDEN MARBLEHEAD Oct. 25 4.13
Deep yellow sport from Marblehead. Develops and supports a maximum of breaks per plant. Very good for the retailer looking for smaller and neater Mums that offer greater versatility for the designer.

YELLOW LACE Nov. 1 3.63
Light lemon spider. Reliable for all programs.

GOOD NEWS Nov. 1 3.63
Intermediate deep lemon yellow. Very durable flower. Best partner for Giant Betsy Ross for high temperature periods when Indianapolis varieties cannot be recommended.

GOLDEN BOY Nov. 1 4.13
Deep lemon yellow incurved standard. Heavy rigid stems with flower size larger than Good News. Flower is softer than News but very resistant to high temperature burn. Best grown pinched May thru Normal flowering.

10 WEEK VARIETIES (Pinch July 28)

INDIANAPOLIS YELLOW Nov. 5 3.38
Incurved lemon yellow. Largest of the yellow Indianapolis varieties.

IMP. INDIANAPOLIS YELLOW Nov. 5 3.38
Tighter form and slightly darker than Ind. Yellow. Generally preferred for northern winter Indianapolis flowering.

YELLOW KNIGHT Nov. 8 4.50
Large deep yellow spider to serve as a companion to Tokyo in any year round program. The flower is durable with good clear color and attractive form.

YELLOW DELAWARE Nov. 8 3.38
Deep yellow semi incurved standard. Tops the field for pots. This is the ideal growth habit and flower size for all flowering periods. The real bread and butter variety for any pot program.

YELLOW PRINCESS ANNE Nov. 10 3.88
Large decorative standard. Sulfur yellow. A very responsive, uniform and efficient pot variety. Outstanding grown as single stem pots and equally valuable pinched. Its Beautiful form provides maximum color display. Color will not tolerate extreme summer heat.

YELLOW STANDARDS (Cont.)

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

GOLDEN PRINCESS ANNE Nov. 10 3.75

The best variety for winter and early spring pot mums. Large decorative form that does not tinge bronze. Sets buds at 56°, is uniform in response with wide breaking habit. Can be raised single or pinched, fall, winter, and spring. Tall treatment. Also makes excellent disbud.

11 WEEK VARIETIES (Pinch Aug. 4)

YELLOW MEFO Nov. 15 3.50

Large incurved deep lemon yellow. Reliable variety for programs November thru April.

CREAM MEFO Nov. 15 3.75

Pleasing light yellow sport of Mefo. Most vigorous of the Mefo family. Produces larger flowers than Yellow Mefo. May be flowered whenever Mefos are recommended.

YELLOW MARKETEER Nov. 18 4.25

Intermediate semi-incurved lemon yellow. Best grown as pinched crop. May be used for pinched or single stem pots.

12 WEEK VARIETIES (Pinch Aug. 11)

DK. YEL. CHATTANOOGA Nov. 25 3.88

Large incurved, deep lemon yellow.

GOLDEN PEARSON Nov. 25 4.38

Intermediate incurved. Soft yellow for normal flowering.

GOLDEN MRS. ROSS Dec. 3 3.88

Large incurved, light golden yellow.

13 WEEK VARIETIES (Pinch Aug. 18)

SMITH'S YELLOW Dec. 10 4.00

Lemon yellow sport of Smith's White. More pleasing color and larger bloom than Tobin's Yellow.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

#2 YELLOW SHOESMITH Nov. 12 3.75

Largest and best selection of Shoesmith to date, rendering it the perfect companion to Fred Shoesmith. Best grown from Mid October to Mid May.

BONNAFFON DE LUXE Nov. 20 3.38

Intermediate deep yellow incurved. Prolific breaking action resulting in fine flower mass for pot plants. Time tested variety. Requires 65° minimum temperature during bud initiation and early development.

HARVESTER Nov. 23 3.75

Intermediate incurved, deep lemon yellow. Most popular variety for normal Thanksgiving flowering.

MARIE DE PETRIS Nov. 23 4.13

Large incurved, deep yellow for Thanksgiving.

GOLDEN PRINCESS ANNE requires two weeks less bench time than does Yellow Delaware. This cuts down crop cost and allows for more production during the year.

The Princess Anne Varieties make nice Single Stem Pots during the Winter and early Spring months when the Delawares are unsatisfactory under single stem programs.

BRONZE & RED STANDARDS

9 WEEK VARIETIES (Pinch July 21)

DETROIT NEWS Nov. 1 3.75

Large incurved bronze. Reliable variety for periods when Indianapolis Varieties cannot be used. Best color when finished cool.

#2 DETROIT NEWS Nov. 1 4.50

This selection is primarily a color improvement, providing a stronger color with more clarity. Best grown for late shadings and normal flowering.

FRED YULE Nov. 3 3.88

Intermediate incurved. Glowing orange bronze. Best grown as pinched crop. Good May thru November.

BRONZE & RED STANDARDS (Cont.)

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

10 WEEK VARIETIES (Pinch July 28)

INDIANAPOLIS BRONZE Nov. 5 3.38

Large incurved buff bronze. October through March blooming.

DARK INDIANAPOLIS BRONZE Nov. 5 3.38

Large incurved dark bronze. Better color expression and retention during high temperature periods, than Ind. Bronze.

DELAWARE Nov. 8 3.38

Large semi-incurved reddish bronze. Outstanding for pots for all programs. Color deepest when finished cool.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

GOLDEN GATE Nov. 10 3.75

A very pleasing, smooth, deep amber bronze decorative. Member of the Princess Anne Family that is so outstanding for late Fall thru early Spring pot Mums. Rounds out the color range for this family for pots or disbuds.

MRS. ROY Nov. 13 4.13

Large incurved, red with copper reverse.

MAPLE LEAVES Nov. 13 4.50

Large, smooth copper colored spider. Perfect companion for Tokyo and Yellow Knight, with same dependable performance.

11 WEEK VARIETIES (Pinch Aug. 4)

BALCOMBE PERFECTION Nov. 18 4.25

Here is a nice addition for normal Thanksgiving flowering. An intermediate incurve, copper bronze standard that is benefitted by cool finishing temperatures.

RED BALCOMBE PERFECTION Nov. 18 4.13

Intermediate incurve standard of outstanding red color with copper reverse. The Balcombe varieties are not tall growers and are benefitted by additional long days under programming.

CALVERT'S GOLD Nov. 20 4.50

Intermediate golden-bronze, semi incurved. Suitable for pots, or as cut flower.

HEAT BUILD UP UNDER CLOTH

This has to be watched. Be sure to read the captions regarding Shading and Heat Delay on page 22 of this catalogue.

12 WEEK VARIETIES (Pinch Aug. 11)

GLADYS PEARSON Nov. 25 4.00

Intermediate incurved, light bronze.

#2 OAK LEAF Nov. 25 3.75

Selection improves the form of Oak Leaf, being more tightly incurved. Color and size the same.

PINK STANDARDS

8 WEEK VARIETIES (Pinch July 14)

PINK CHIEF Oct. 15 4.00

Intermediate incurved, lavender. Withstands lower temperatures. Valuable for outside shade.

SHADING — Up until the first of September it is best to shade until color shows. During the month of September it is permissible to stop shading when bud is swelled.

9 WEEK VARIETIES (Pinch July 21)

BUNBU Nov. 1 3.63

A large, fully double, medium lavender pink spider. Outstanding growth habit renders the variety much superior to Mary Garden for regular standards or as fast disbud, from April through November.

BLUE RIBBON Nov. 1 3.63

Bright lavender pink incurved. Outstanding pot plant variety, year 'round. Holds color well.

PINK STANDARDS (Cont.)

---------	---------	------------------

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

10 WEEK VARIETIES (Pinch July 28)

INDIANAPOLIS PINK Nov. 5 3.38

Large incurved, deep lavender. Unequaled variety, for flowering at any time of year except from late June through early September. Maintains fine form even through low light conditions.

DARK ORCHID QUEEN Nov. 10 4.25

Large incurved dark lavender. Can be flowered September thru May.

PRINCESS ANNE Nov. 10 3.63

Large decorative standard. Salmon pink. Valuable new color and form addition for the mid September through mid May pot program. Single stem pots are superlative especially when cool finishes can be provided. Pinched pots spread and break well with excellent uniformity and response.

PINK FRED SHOESMITH Nov. 12 4.38

Large light pink sport of Fred Shoesmith. Maximum color expression obtained only with cool finish. Habit and response are identical to parent variety, increasing the color range for this outstanding family.

11 WEEK VARIETIES (Pinch Aug. 4)

CALVERT'S PINK Nov. 17 4.50

Intermediate orchid pink suffused with salmon. Unsurpassed for Thanksgiving.

THANKSGIVING PINK Nov. 23 4.13

Intermediate reflexed, amaranth.

12 WEEK VARIETIES (Pinch Aug. 11)

PINK PETER JOHN Nov. 25 4.00

Large reflex, light Orchid Pink.

ROSE HARRISON Dec. 3 4.25

Large reflex with a true shell pink color.

WHITE POMPONS, SINGLES AND ANEMONES

7 WEEK VARIETIES (Pinch July 7)

CHRISTOPHER COLUMBUS Oct. 1 4.50

A pleasing cream colored medium sized decorative pom. Very prolific in the garden. Outstanding for Spring and Fall pots. Good cut flower variety.

HORIZON Oct. 5 3.75

Intermediate decorative pom, produced on good sprays with excellent stem and foliage. Very good cut flower under glass or in the garden as well as for Spring pot plants.

8 WEEK VARIETIES (Pinch July 14)

BLIZZARD Oct. 15 4.00

Small formal pompon. Clear white, durable flowers on well formed sprays. A very prolific cut flower and garden variety useful under glass or in the cloth house.

PRISTINE Oct. 20 4.50

Pure white, intermediate pompon. Good response to all shade programs.

9 WEEK VARIETIES (Pinch July 21)

POPCORN Oct. 25 4.00

Intermediate pompon. Pinkish white tinges that diminish with higher temperatures.

KEEPSAKE Oct. 25 3.63

Intermediate pompon, Cream-white. Temperature tolerant, suitable for all shade programs. Slight pinking with low finishing temperatures.

WHITE POPCORN Oct. 25 3.50

Intermediate pompon, cream-white. No traces of pink. Short and prolific growth habit.

WHITE KEEPSAKE Oct. 25 3.63

Intermediate ivory pompon. Good April thru October.

WHITE POMPONS, SINGLES AND ANEMONES (Cont.)

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

PINOCCHIO Oct. 25 3.38

Small white pompon, Very heavy producer. Good response to all programs.

MEMENTO Oct. 30 3.75

Intermediate chalk white single with green discs and durable petals that retain their original form into maturity. Reliable cloth house variety July thur Oct. and in greenhouse May through Oct.

WHITECHIP Nov. 1 4.50

This selection rounds out the color cycle on the Chip family. It does not have the same versatility as do the other Chips because of pinking under cool finishes, but it provides the reliable white pom for flowering during the hot periods when Icebergs can stall. A topnotch variety for June thru September flowering.

10 WEEK VARIETIES (Pinch July 28)

ICEBERG Nov. 5 3.38

Here is an outstanding large white pompon that can be raised the year 'round. Requires 60° for bud initiation. Offers a productive 10 week variety for northern programs. Benefited by center bud removal. Excellent for disbud program.

WHITETOP Nov. 5 3.38

Intermediate decorative, pure white. Responds well to all programs. Many consider this to be the most dependable variety for outside shade.

SUPERTOP Nov. 5 3.75

The largest and most beautiful decorative form selected from Whitetop to date. Its increased size is combined with a flat form that does not reflex like the parent.

FEATHERTOP Nov. 5 4.25

One of the most distinctive poms, characterized by strong and vigorous growth. The clear white petallage is feathered and partially tubular surrounding a green center that closes with development. Usable in all 10 week programs.

PING PONG BGA Nov. 5 3.88

Small, clear white formal pom. Larger than Pinocchio. Strong, rigid stems with durable flower.

ENCORE Nov. 5 4.13

Intermediate pompon, pure white. Clean grower.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

#2 WHITECHIP
(Available May1) 9 wk. Nov. 1 4.50

A selection that gives a clearer white flower when Whitechip is showing the pink overcast. This selection will also tinge pink when finished cool but can be recommended for flowering from mid-May to mid-October.

SEA GULL Nov. 1 3.88

Intermediate pompon, ivory white.

ALASKA Nov. 1 3.50

Intermediate White anemone with white cushion. Good for Spring and Fall shade program.

THISTLEDOWN Nov. 1 4.25

A clear white novelty that improves Snowdrift in color clarity and offers a larger flower. Characterized by open terminal growth it is a designers delight for adding distinction to their work. Wholesalers find a definite demand for flowers of this type, and they do much to foster increased sales.

DAWN STAR BGA Nov. 10 3.75

Intermediate, white pom. Good producer and exceptionally good for hot weather flowering. Not as large as Iceberg.

SHASTA Nov. 10 3.38

Large anemone, white, yellow cushion. Very dependable. Tolerates 56°. Best anemone for all season programs.

ICE FOLLIES BGA Nov. 10 3.50

Large, chalk white decorative. Provides a white pot variety to be coupled with the Princess Annes under tall treatment. Early disbudding is recommended to increase size.

STARBURST BGA Nov. 10 4.50

Pure white feathered decorative that can be grown year round as cut flower or pot plant using tall treatment. All round improvement on Crystal Varieties.

Large, vigorous, pure white decorative. Dependable off-season pom. Best with center bud removed.

LITTLE AMERICA Nov. 10 3.50

Intermediate anemone, pure white. Good for Pots and Shading programs.

ILLINI IGLOO Nov. 10 3.50

Intermediate white Formal pompon, creamy center. Very productive. Good year 'round.

ILLINI SNOWDRIFT Nov. 12 3.38

Quilled, intermediate decorative. Responds well to all 10 week programs.

---------	---------	------------------

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

11 WEEK VARIETIES (Pinch Aug. 4)

SCULPTURE Nov. 15 4.13

Large ivory-white single. Very strong growth habit. Valuable in January and February flowering.

WHITE TAFFETA Nov. 15 3.75

Intermediate decorative, pure white sport of Taffeta. Taffeta family provides fine companions for Sculptures for northern winter flowering.

JUPITER BGA Nov. 20 4.00

Large, vigorous, pure white decorative. Dependable off-season pom.

L. I. BEAUTY Nov. 20 3.63

Large anemone, white, yellow center.

HIGHBROW Nov. 20 3.75

Intermediate decorative, ivory-white. Very productive quality pompon.

PRISCILLA Nov. 20 4.00

Intermediate pompon, ivory-white.

DIVINITY BGA Nov. 20 4.50

Pure white, intermediate anemone, providing an ideal companion for Shane. Best flowered October thru April.

GRECOS CARNATION Nov. 20 4.50

A clear white intermediate pom with finely serrated petals creating a form somewhat similar to that of a carnation. This pom is not a novelty but rather a much needed clear white for its natural season. In as much as the variety performs best with high light intensity it should not be used in light programs.

WHITE DELMAR Nov. 20 4.00

White intermediate pom for Thanksgiving. Tinges pink when finished cool. Should be grown at 60°.

NEVADA Nov. 20 4.50

Intermediate anemone, white with green cushion.

PARAMOUNT Nov. 23 4.50

Intermediate formal pompon, white. Free Sturdy growth.

BELRAY Nov. 24 4.38

Large Pompon, pure white. Tall grower.

12 WEEK VARIETIES (Pinch Aug. 11)

WHITE VALENCIA Nov. 28 4.13

Large single, white. May be disbudded.

FORTUNE Dec. 1 4.50

Intermediate pompon, white. Quality flower for November and December.

13 WEEK VARIETIES (Pinch Aug. 18)

ACCLAIM Dec. 5 4.00

Large formal pompon, clean growth. Outstanding quality pompon in Northern programs.

ICECAP Dec. 10 3.38

Intermediate white pom that will initiate bud and develop at 56 degrees, making it very desirable for northern winter programs. A very vigorous and productive addition that does not pink.

ILL. ALBA Dec. 5 4.38

A beautiful chalk white daisy that does not pink either from low temperature or from aging. Alba will tolerate 56 degrees for initiation and development and offers dependability for winter programs. Improvement on Yukon.

WHITE MINSTREL Dec. 12 4.50

White sport of Minstrel. A valuable variety to supplement this group of reliable December poms so popular with the Northern growers.

TALMEDA Intermediate white pompon. Good form and substance. Fine follow up variety for Revelation.	Jan. 5	4.00

ILLINI SNOWBOUND Intermediate decorative with cream center. Requires 60° for bud initiation and 50° for development.	Jan. 5	4.00
ILLINI CASCADE Intermediate decorative, clear white. More temperature tolerant than Illini Snowbound.	Jan. 5	4.00

YELLOW POMPONS, SINGLES AND ANEMONES

7 WEEK VARIETIES (Pinch July 7)

YELLOW CHRIS. COLUMBUS Large Yellow decorative. Recommended for Pot Plants and Garden culture. Good cut flower.	Oct. 1	4.50
---	---------------	-------------

CHARLES NYE Large deep lemon yellow pompon. Best cut flower variety for this early flowering date.	Oct. 5	4.50
--	---------------	-------------

8 WEEK VARIETIES (Pinch July 14)

SARASOTA Medium pompon, bright lemon yellow. Good cut flower for early shade.	Oct. 15	4.00
---	----------------	-------------

YELLOW CALUMET Lemon yellow sport of Calumet. Very nice growth habit for early cut flowers.	Oct. 15	4.50
---	----------------	-------------

9 WEEK VARIETIES (Pinch July 21)

GOLDEN HERALD Large golden yellow decorative. Will tolerate high July temperatures for shade program. Nice fast disbud.	Oct. 25	4.13
---	----------------	-------------

GOLD COAST Intermediate, deep lemon yellow pompon. Heavy producer and one of the most popular varieties.	Oct. 25	3.38
--	----------------	-------------

HAPPINESS Large golden yellow single. Good producer and very reliable during high temperature periods.	Oct. 28	3.75
--	----------------	-------------

SAUTERNE Intermediate single. Intense yellow. Most attractive yellow single available to date for Greenhouse programs.	Oct. 30	4.13
--	----------------	-------------

#2 DANDY Selection from Dandy that improves color clarity and form. Same reliable response and excellent vigor and production.	Nov. 1	4.38
--	---------------	-------------

YELLOWCHIP Bright lemon yellow sport of Bluechip. Same outstanding characteristics of parent. Reliable performance will be especially welcome for summer flowering.	Nov. 1	3.88
---	---------------	-------------

SUNRAY Small anemone, lemon yellow. Responds to shade and may be used for pots in Spring, Summer or Fall.	Nov. 3	4.13
---	---------------	-------------

YELLOW POMPONS, SINGLES AND ANEMONES (Cont.)

Stafford Mums

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

10 WEEK VARIETIES (Pinch July 28)

YELLOW BEAUREGARD Nov. 5 3.50

Intermediate pompon, deep yellow. Outstanding pompon for flowering May thru November. Especially valuable for summer flowering.

YELLOW TOP Nov. 5 3.88

Bright lemon yellow sport from Whitetop with same versatility, and dependability.

YELLOW ICEBERG Nov. 5 3.38

A beautiful yellow sport from one of the top white poms. Especially valuable in the early shade programs. Retains same vigor and other outstanding qualities of the parent Iceberg.

#2 YEL. ICEBERG Nov. 5 3.50

Deep yellow sport from Yellow Iceberg. As well as intensified color this sport displays a small improvement in size and form over the original Yellow Iceberg. It should eventually replace the original Yellow Iceberg and become recognized as the best in its class. Greenhouse and cloth house, Fast and Regular programs.

JACKSTRAW BGA 10 week Nov. 5 4.50

Deep yellow feathered decorative for pots or cut flower. Temperature tolerant. Improvement in color and better spray formation than Yellow Illini Snowdrift, especially with center bud removed.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

LUXURY Nov. 8 3.75

Large decorative which can be raised as a spray or as a fast disbud. Bright yellow when flowered under summer conditions. Bronze tinge with cooler finish.

HEYDAY Nov. 10 3.75

Intermediate bright yellow pom. Will initiate and develop at 56°. Tall rigid growth habit. Spray formation and reliability render it tops for early Spring flowering. Excessive high summer temperatures can prove harmful.

YELLOW SHASTA Nov. 10 3.38

Large anemone, light lemon yellow. Best anemone for all season programs.

GOLDEN SHASTA Nov. 10 4.13

Large deep yellow selection from Yellow Shasta. Same vigor and versatility as parent variety.

YELLOW IGLOO Nov. 10 3.63

Intermediate deep lemon yellow, formal pompon. Good Spring thru Fall.

11 WEEK VARIETIES (Pinch Aug. 4)

YELLOW TAFFETA Nov. 15 4.50

Lemon yellow decorative pom. Sport of Taffeta.

YELLOW SCULPTURE Nov. 15 4.50

Large, lemon yellow daisy. Exceptional growth habit. Reliable for January and February flowering. Temperature tolerant.

GOLDEN CHORD Nov. 15 3.63

Intermediate golden yellow pompon. Sturdy, productive growth habit.

FORTY-NINER Nov. 15 4.00

Large formal pompon, golden yellow. Color has real appeal for fall season.

SOUVENIR Nov. 15 4.13

Intermediate deep yellow single. Vigorous habit coupled with high production. Recommended September thru May.

GOLD BALL Nov. 15 4.00

Intermediate pompon, golden yellow. Vigorous free growth habit.

SHANE BGA Nov. 20 4.13

Large dark yellow anemone. Very vigorous grower. Avoid high temperatures. Best flowered October, November, March and April.

ILLINI GOLDRIFT Nov. 18 4.50

Bright golden intermediate decorative, with fringed florets similar to Snowdrift. Stronger stems and a very prolific blooming habit. Attractive as a novelty pot plant with tall treatment. Useful September thru December.

YEL. L. I. BEAUTY Nov. 20 4.00

Large anemone, yellow with yellow center.

YELLOW Highbrow Nov. 20 3.88

Large decorative, golden yellow. Responds to late cloth house program.

LOLLIPOP Nov. 20 3.75

Formal round hard lemon yellow pompon. Crops perfectly for Thanksgiving.

PIPPIN Nov. 20 3.88

Intermediate pompon, deep lemon yellow. Good producer.

ILLINI SUNSPOT Nov. 20 4.50

Large pompon, yellow. Sturdy, somewhat short growth habit.

SULTAN Nov. 22 4.50

Large formal decorative, golden yellow. Handles easily, and very productive. One of the best for the season.

YELLOW GALAXY	Dec. 1	3.75
Intermediate single, lemon yellow. Most attractive and useful from October thru winter program.		

13 WEEK VARIETIES (Pinch Aug. 18)

GOLDEN ACCLAIM	Dec. 5	3.88
Large pompon, golden yellow. Clean growth and responds well to all Winter programs.		
CORONATION	Dec. 5	3.75
Intense golden yellow decorative. Larger more beauti-		

fully formed than Corsair and responds more uniformly as the variety will initiate and develop at 56 degrees.

CORSAIR	Dec. 10	3.50
Large pompon, lemon yellow. Outstanding for quality, vigor and production.		

14 WEEK VARIETIES (Pinch Aug. 25)

YELLOW GARZA	Dec. 15	4.00
Intermediate anemone, yellow. Latest yellow anemone.		
SHAMROCK	Dec. 15	4.38
Large decorative, deep lemon yellow. Heavy growth habit.		
VIBRANT	Dec. 20	3.75
Intermediate decorative. Deep lemon yellow. Strong		

grower. Often used where headroom is limited. Very productive.

SUNRISE	Dec. 20	4.00
Intermediate pompon, deep lemon yellow, withstands lower temperatures.		

GOLDEN ELEGANCE	Dec. 20	4.25
Intermediate lemon yellow sport from Elegance. Production is high coupled with a good spray formation and clean growth habit.		

15 WEEK VARIETIES (Pinch Sept. 1)

YULEFLAME	Dec. 25	4.50
Large decorative. Deep lemon of outstanding quality.		
YELLOW SNOW	Dec. 25	3.75
Intermediate pompon, deep lemon yellow. Requires 60° for bud initiation.		

ILL. YEL. SNOWBOUND	Jan. 5	4.25
Intermediate pompon, light lemon yellow. Latest yellow pompon. Requires 60° for bud initiation and 50° for development.		

YELLOW ILL. CASCADE	Jan. 5	4.50
Large lemon yellow sport from Illini Cascade.		

BRONZE & RED POMPONS, SINGLES & ANEMONES

7 WEEK VARIETIES (Pinch July 7)

HUNTSMAN	Oct. 5	4.13
Large decorative pompon, scarlet-orange. Tall, garden and cut flower variety.		

CARNIVAL	Oct. 10	4.50
Large pompon, burnt orange. Very good cut flower and garden variety. Medium height.

---------	---------	------------------

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

8 WEEK VARIETIES (Pinch July 14)

CALUMET Oct. 15 4.50

A large apricot bronze pompon of superior flower quality making well formed sprays. Excellent all around variety for the garden background, cloth house, spring pot plants and normal flowering.

DARK CALUMET Oct. 15 4.50

Dark bronze sport of Calumet. Fine color for this valuable period.

RAJAH Oct. 15 4.50

Intermediate single, striking rich red daisy. Excellent cut flower for the garden and under glass.

RADIANCE Oct. 15 4.50

Intermediate red decorative pompon. Breaks freely and responds uniformly. Beautiful non-fading color. Very prolific and useful for garden and Spring pot plants.

9 WEEK VARIETIES (Pinch July 21)

BRONZE DOT Oct. 25 3.75

Intermediate pompon, light bronze with dark center.

BUCKSKIN Oct. 25 3.63

Tawny-bronze single. Very productive and responsive under shade.

PANORAMA Oct. 25 4.50

Large bronze decorative. Similar to Bronze Goldsmith in color, but brighter. Best grown May thru Oct. with center bud removal.

NAVAHO Nov. 1 4.50

Intermediate pompon, mahogany-red.

BRONZECHIP Nov. 1 3.38

Lively Orange-bronze sport of Bluechip. Temperature tolerant. Color expression increases with cooler conditions.

COPPERCHIP Nov. 1 4.25

A selection from Bronzechip that is more resistant to fading or dulling of color. The color is bright amber bronze. The variety is an addition, not a replacement to the versatile Chip family. Recommended May thru November.

10 WEEK VARIETIES (Pinch July 28)

RED JETFIRE Nov. 5 4.25

Selection is more vivid in color than Jetfire with better color retention thereby extending the flowering period over its parent to include the summer months.

ORANGE BEAUREGARD Nov. 5 4.00

Intermediate pompon, orange-yellow sport of Beauregard. The Beauregards are a very versatile and reliable family. Tolerates 56° for bud initiation.

BEAUREGARD Nov. 5 3.50

Intermediate pompon, red-bronze. Develops most desirable spray formation during high light conditions.

DILLON BEAUREGARD Nov. 5 3.63

Intermediate pompon, intense reddish bronze. An all around size and form improvement over Dark Beauregard. Tolerates 56°.

RUBICON Nov. 5 3.88

Large decorative, red. Good for Fall programs.

BRONZE DELIGHT Nov. 5 4.50

Intermediate daisy. Intense reddish-bronze. Same outstanding growth habit of parent. Fills definite gap in 10 week varieties for a versatile bronze single.

WARHAWK BGA Nov. 5 4.50

Large bright red decorative for Pot Mums. Under short treatment gives same fine habit and form as Delaware. Improves Red Star and Vulcan in all respects including color retention.

BITTERSWEET Nov. 5 4.13

Intermediate single, bitter-sweet red. Good variety for Fall shading and normal flowering.

DK. BR. MASTERPIECE Nov. 12 4.00

Large pompon, dark bronze, sport of Masterpiece.

PARAGON Nov. 12 4.50

Large pompon, red. Good quality flower.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

11 WEEK VARIETIES (Pinch Aug. 4)

BEAUREGARD SUPREME Nov. 15 3.75

Selection from Beauregard maintaining same desirable color but nearly doubles flower size while offering increased vigor and more open spray formation. Extends the Beauregard season and performs well for late shade programs.

RANGER Nov. 15 4.38

Striking orange pom. Excellent grower, very productive and high temperature tolerant. Can be used in Sept., October shadings.

DARK BRONZE RANGER Nov. 15 4.50

Red bronze sport of Ranger. Similar to Beauregard in color. Good vigor coupled with color retention make it an ideal late cloth house performer.

BRONZE TAFFETA Nov. 15 4.50

Bronze decorative pom. Sport of Taffeta.

LEGAL TENDER Nov. 20 4.25

Intermediate decorative, red-gold.

RUSTICON Nov. 20 4.25

Intermediate pompon, rust-red.

THELMA Nov. 20 3.63

Intermediate pompon, orange-red. Holds its brilliant color well. Good September to December.

RUBAIYAT Nov. 20 3.63

Intermediate formal pompon, velvety red. Unequaled for Fall thru Christmas Season.

OLNURA Nov. 22 4.50

Large apricot buff anemone. Valencia size. Attractive as disbud, or grown in sprays. Responds to light and shade for flowering Sept. thru December.

FESTIVAL Nov. 23 4.50

Intermediate single, apricot-red. Attractive variety for this season.

RED ROLINDA Nov. 23 4.25

Intermediate anemone, red. Durable Thanksgiving variety.

12 WEEK VARIETIES (Pinch Aug. 11)

ILL. REDWOOD Nov. 25 4.25

Large pompon, reddish-bronze, durable well formed flower for Thanksgiving and December.

BR. GOLDSMITH Nov. 25 4.50

Large decorative, orange-bronze. Attractive Thanksgiving color.

APRICOT VALENCIA Nov. 28 4.38

Large single, apricot bronze.

GALAXY Dec. 1 3.88

Intermediate single, orange-scarlet. Striking color and good production.

CRACKERJACK Dec. 1 4.00

Intermediate daisy, vigorous and productive, that is best described as a Red Galaxy. A real eyecatcher for wholesaler or retailer.

13 WEEK VARIETIES (Pinch Aug. 18)

DEBONAIR Dec. 5 4.50

Large pompon, crimson red. Well formed flower with good color.

FLAME MINSTREL Dec. 13 4.50

Intermediate pompon. Reddish bronze Minstrel selection. Better color for this season than Bronze Minstrel.

CHRISTMAS STAR Dec. 13 4.25

Intermediate single, scarlet. Good production and quality.

Catalogue and Program Pinch Dates, as listed, are a guide — not a must. The only Must about pinching is that there be new, soft, growth . . . Be sure that you have it.

* * *

SHALLOW PLANTING A MUST—

Cuttings should not be planted any deeper than they were in the rooting medium.

PINK POMPONS, SINGLES & ANEMONES

8 WEEK VARIETIES (Pinch July 14)

ACCOLADE Oct. 15 4.50

Intermediate decorative. Close to true Carnation Pink. Best grown pinched, producing vigorous stems with well developed sprays.

ENTERPRISE Oct. 15 4.25

Large pompon, amaranth rose, produced on well formed sprays with strong rigid stems. Good quality flowers for the cloth house or normal flowering.

9 WEEK VARIETIES (Pinch July 21)

PINKETTE Oct. 25 4.00

Intermediate Dark Pink Pompon. Good for Spring, Summer and Fall programs.

PEARLCHIP Nov. 1 4.50

Lustrous, apple-blossom pink decorative. Quality pom with great appeal. True color best expressed in Spring and Fall.

REWARD Oct. 25 3.63

Intermediate single, lavender. Outstanding pink for the shade program. Productive.

BLUECHIP Nov. 1 3.38

Intermediate luminous pink decorative. Original of the Chip family. Will tolerate 56° and is especially valuable for its color retention quality. Top notch pompon Spring thru Fall.

PINK DOT Oct. 25 3.88

Intermediate pompon, light lavender, with dark pink eye. Good shade variety.

DARKCHIP Nov. 3 3.38

Bright, dark lavender sport of Bluechip. Selection displays better color retention during summer than the parent variety. Somewhat stronger growth habit maturing a few days later.

CHERRYCHIP Nov. 1 4.38

Bright new rosepink sport from Bluechip. Another useful color addition to this ever increasing strain.

10 WEEK VARIETIES (Pinch July 28)

PARISIENNE Nov. 5 3.75

Intermediate single, nearest to true pink.

MERMAID BGA 10 wk. Nov. 5 3.50

Intermediate pompon disbuds for pots. Fits in perfectly with Delawares on Short Treatment. It is lavender pink with tone on tone center contrast, and with color retention qualities for year round flowering. Excellent breaking action with the full foliar type growth you get with Delawares.

DELIGHT Nov. 5 3.75

Intermediate dark pink daisy. Productive, durable and of striking color. Exceptional vigor under light programs for Spring, and dependable for Fall shade.

PORTRAIT Nov. 8 3.50

Large decorative pompon, deep lavender. Useful as cut Flowers March thru June and Sept. thru November. Also adaptable to pot work year round.

PENNANT Nov. 10 3.63

Intermediate decorative, deep pink. Suitable for Spring, Summer and Fall flowering. Tolerates 56° and withstands high temperatures, without delay and a minimum of fading.

#2 PENNANT (Available May 1)

Nov. 10 4.50

Here is a real improvement in Pennant. Size of bloom and vigor of plant rate it as the companion for Iceberg. Withstands high and low temperatures. Recommended for flowering March thru November.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

HUMDINGER Nov. 10 3.75

Large violet purple pom. Good for Spring and Fall Programs. Makes a distinctive pot variety.

PERSONALITY Nov. 10 3.75

Large luminous pink incurved pompon for pots. Shorter, more responsive and tolerant to low temperature than Queen of Pinks. Good breaking action and pot form for October thru June under Medium treatment.

MASTERPIECE Nov. 12 4.13

Large pompon, deep lavender.

You owe it to yourself —

ORDER EARLY — PAY PROMPTLY

11 WEEK VARIETIES (Pinch Aug. 4)

VEDOVA Nov. 15 4.00

Extra large Valencia size Anemone. Pastel shade of a lustrous pink with small green tipped cushions. The beauty and quality of this variety make it especially good as a fast disbud, display or a pot variety.

TAFFETA Nov. 15 3.88

Two-tone pink decorative. Good for off season flowering. Desirable growth habit and handles well.

ALMEGA Nov. 15 4.38

Large pompon, silverly pink. Distinctive color. Durable flower with good keeping qualities.

DELMAR Nov. 20 3.50

Intermediate pompon. Light lavender pink. Distinctive Dot color contrast. Excellent spray formation. Strong and productive in fall and winter spray programs.

PINK L. I. BEAUTY Nov. 20 4.38

Large orchid pink anemone, yellow cushion. A large novelty flower when disbudded.

ILLINI FORMAL Nov. 23 4.50

Intermediate rose pink pompon. Large unique flower on well formed sprays for Thanksgiving. Exceptionally heavy producer.

12 WEEK VARIETIES (Pinch Aug. 11)

VALENCIA Nov. 28 4.25

Rose Pink Single. Large flowers supported on long strong pedicles.

DARK PINK VALENCIA Nov. 28 4.38

Large single, dark orchid-pink. The Valencia's make a nice large disbud.

PINK POMPONS, AND ANEMONES (Cont.)

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

13 WEEK VARIETIES (Pinch Aug. 18)

ENCHANTRESS Dec. 5 4.00
Large anemone, lavender pink with yellow cushion.

MINSTREL Dec. 13 4.25
Intermediate pompon, lavender. Quality pompon for November and December.

DEBUTANTE Dec. 10 3.75
Large single, lavender. Good for mid-winter flowering. Withstands lower temperatures.

GAY MINSTREL Dec. 13 4.50
Intermediate pompon. Sport of Minstrel, but a lighter pink. Less vegetative and a clearer color than Imp. Pink Minstrel.

14 WEEK VARIETIES (Pinch Aug. 24)

ALVODA Dec. 15 3.75
Large smooth Portait pink decorative. A very dependable variety for cool units. Tolerant of 56° with best color expression under like conditions.

DEFIANCE Dec. 20 4.38
Intermediate decorative lavender. Very fine performer for normal flowering.

DISTANCE TO PLANT

To produce quality blooms for either a pinched or no pinch crop, spacing as shown in schedule below is

recommended. Spacing recommendations are governed by light intensity at various times of the year.

SPACING FOR NO PINCH CROP

SPACING FOR SINGLE PINCH CROP

Crop Flowering	Pompon	Standards & Disbuds
May — Sept.	4 x 5	6 x 4
Sept. — Nov.	4 x 6	6 x 5
Nov. — Mar.	4 x 7	6 x 6
Mar. — May	4 x 6	6 x 5

Crop Flowering	Pompon	Standards & Disbuds
May — Sept.	8 x 6	8 x 7
Sept. — Nov.	8 x 7	8 x 8
Nov. — Mar.	8 x 8	8 x 9
Mar. — May	8 x 7	8 x 8

CHART SHOWING NUMBER OF CUTTINGS REQUIRED TO PLANT YOUR BEDS OR BENCHES.

Spacing	No. of Cuttings —				
	Per 10 sq. ft.	Per 15 sq. ft.	Per 25 sq. ft.	Per 50 sq. ft.	Per 100 sq. ft.
5" x 6"	48	72	120	240	480
5" x 8"	36	54	90	180	360
6" x 6"	40	60	100	200	400
6" x 7"	34	51	84	170	340
6" x 8"	30	45	75	150	300
7" x 8"	26	39	65	130	260
8" x 8"	22	33	56	112	225
8" x 9"	20	32	52	104	208

For larger areas add quantities to meet total area.

E.g. — 125 sq. ft., add 120 (25 sq. ft.) and 480 (100 sq. ft.) = 600 R.C.

Did You Check "Early Order" and "Quantity Discounts" on Page 2.

YEAR ROUND FLOWERING OF CHRYSANTHEMUMS

YEAR ROUND FLOWERING

By using artificial light or shading with black cloth, Chrysanthemums can be flowered at any time.

If you wish to flower 'MUMS at any time other than their normal flowering season, select your flowering date or dates and order your stock early to be sure you have them to plant at the proper time. Then be prepared to light or shade them as your program requires.

LIGHTING

Lights are needed to prevent formation of buds before required growth is attained. A light intensity of not less than 10 foot candles is necessary to accomplish this, or approximately 1½ watts of light per square foot of space, including walks. For small installations 60 watt lights, under reflectors, spaced 4 feet apart; or 100 watt lights, under reflectors, spaced 6 feet apart and about 30 inches above the tops of the plants will usually prove satisfactory. **AT NO TIME SHOULD THERE BE MORE THAN 8½ HOURS OF DARKNESS.** Consequently lights should be applied preferably after 10 P.M., or as near midnight as possible, and lighted for the required number of hours as shown in the schedule.

Lighting Plants on a small scale.

When a small block or any part of a house is to be grown under lights be sure to drop a black cloth to cut off any other plants around them so their growth will not be affected by the lights. In other words the plants to be grown under lights must be isolated from any other plants around them during the hours of lighting.

ADDITIONAL LIGHTING SCHEDULE

- 2 Hours during the months of August, April, May.
 - 3 Hours during the months of September, October, March.
 - 4 Hours during the months of November and February
 - 5 Hours during the months of December and January
- Temperature** — To flower under lights during the winter months it is necessary to keep a minimum temperature of 60 to 65 degrees, and not less than 60 degrees at night, during the period of growth and bud formation. After color shows in the buds, lower temperature gradually to 54-56 degrees to harden off the finished flowers.

SHADING

On programs calling for shading with Black Cloth, the plants should be covered so as to receive about 12 or 13 hours of darkness, e.g. 6:30 P.M. to 7:00 A.M. Shading for longer periods cuts down valuable day length and results in a somewhat less productive crop. Many growers, due to closing hours etc., shade at 4:30 or 5:00 P.M. This practice has proven satisfactory but undoubtedly the crop would be benefited by the cloths being applied an hour or so later.

HEAT DELAY

Abnormally high temperatures building up under cloth can wipe out an entire crop or delay the flowering by weeks. If at shading time the temperature is abnormally high it is better that you only pull the cloth but do not close the beds completely. Skipping the

complete shading on a few nights will not effect much difference in flowering date whereas through shading on these nights a possible crop failure or delay of weeks may be the result.

YEAR-ROUND LIGHTING AND SHADING SCHEDULE

13 week	Aug. 21	
14 week	Aug. 28	

YEAR ROUND CUT FLOWER SCHEDULES

Schedules for flowering Mums throughout the year begin on page 24 of this catalogue. The schedules as set up allow for maximum growth and can, through proper planning and growing, be cut down by two to three weeks and still achieve a stem length of approximately 36 inches. This shortening of bench time is best accomplished by planting and pinching two to three weeks later than dates listed in the schedules. If you plant later than the date given do not attempt to pinch on the listed pinch date, for more harm than good can be done by any attempt to pinch a cutting that is not well established and making new growth. Pinching into hard growth will reduce greatly the number of breaks per plant and the resulting breaks will not have the vigor and strength desired. It is much better that one wait additional time to obtain soft growth before pinching.

YEAR ROUND POT MUMS

'Mums as pot plants can be grown throughout the entire year, or for that particular time when you are looking for a fast, dependable crop to fill a gap in your greenhouse programming.

A program of continuous supply is a real money maker offering a surprisingly high square foot return. In fact we believe it can produce the highest average return of any Mum program.

Here is an example of what can be accomplished with only 800 square feet of bench space. — This area will produce 50 Six Inch Pots every week of the year or a total of 2600 pots, grown single pinch method. Under single stem, or no pinch method, this same area would produce better than 3200 pots per year.

A complete schedule for year round pot mums can be found starting on page 29 along with a listing of the better varieties to be used, and treatment to be followed. We will be glad to serve you in setting up a schedule to fit your particular requirements as to space available and expected demand at different times of the year.

YEAR ROUND FLOWERING OF CHRYSANTHEMUMS

Stafford Mums

POT TIPS

A good pot requires a good start. This can best be accomplished by careful grading of cuttings for both height and stem diameter for each pot. This is important for uniform pots. When planting, plant shallow and set the cuttings on a slight outward angle and at uniform distances around the edge of the pot. Do not plant one in the middle unless you are going into a seven or eight inch pot. Planting on a slight angle increases the basal foliage, the amount of strong breaks and adds immeasurably to the appearance and size of the plant.

In general we recommend the single pinch method of five cuttings in a six inch pot as the most acceptable plant. However a variation in size is often quite desirable, such as four cuttings in a five inch pot or possibly a few larger seven or eight inch pots. Our trials and experience have shown the retail florist is often interested in something larger than the six inch pan especially at holiday periods. We recommend the use of the shorter Azalea pot regardless of the size pot being used.

Some growers recently have had encouraging success using a no-pinch program. To do this, short days are applied at the time of potting and the pot is finished within 9, 10 or 11 weeks, depending on response group selected. This single stem method requires more exacting culture from potting until bud selection.

SHORT OR FAST DISBUDS

Short Disbuds or Fast Disbuds are becoming increasingly popular throughout the trade with both wholesale and retail growers. Under this program you can achieve three and a half to four inch flowers on 24 to 30 inch stems in 11 to 17 weeks (regular schedules are 16 to 22 weeks), depending on the time of year. This schedule allows for nearly three and a half crops to be produced during the year for a total production of approximately 40 individual blooms per square foot. For the wholesale grower these disbuds will in fact augment his sales of regular Mums and poms. For the retail grower they offer a greater variation and more practical use than do the larger Mums and with the shorter schedules can increase the amount of flowers they can raise for their own use. Most retail growers who have tried them find them profitable and are now willing to seek outside sources to purchase the largest mums when needed.

This is a pinch crop with your preference as to two or three stems per plant. On the Indianapolis varieties we recommend two per plant allowing three on the outside rows only. Pruning should be done within two weeks after pinch so as to increase the vigor and quality of the selected shoots and resulting blooms.

Generally we recommend spacing of 12 square inches per bloom during the summer, 13 or 14 square inches per bloom during spring and fall and 16 square inches per bloom during the winter flowering.

RECOMMENDED DISBUD VARIETIES

Listed below are the varieties with their recommended periods of flowering, which in our trials have proven to be the most productive and durable, and more generally profitable. A few varieties such as the Shastas and Long Island

Beautys seem to be satisfactory for limited quantities but generally do not achieve nor demand a satisfactory commercial price. The varieties listed therefore are generally better commercially.

FLASH LIGHTING

Much interest has justifiably been generated by the research work of Dr. Sid Waxman of the University of Connecticut, on Flash Lighting for Chrysanthemums.

This new approach to lighting has been explored and tested with many variations as to the actual minutes of light applied to the growing plants for flowering and for stock propagation.

To date the recommendations for this method of lighting are that you light for four seconds a minute for four hours during the middle of the night under a light intensity of 20 foot candles at every point of bench area. It is imperative that you check your light intensity before attempting to use this method of interrupted lighting.

Dr. Waxman is continuing this work to see if this light intensity might be lessened in the future and to test more varieties. To date this work has been done primarily using the 9 and 10 week response groups. Among the varieties successfully tested have been the Shastas, Indianapolis, Mefos, Ill. Igloos, Icebergs, Delights and Darkchip.

RECOMMENDED VARIETIES FOR POT PLANTS

Stafford Mums

VARIETY	TREATMENT	RECOMMENDED FLOWERING PERIOD	
		PINCHED	SINGLE STEM
WHITE	9 week		
	Wilson's White	Short	Mar. thru Nov.
	Queen's Lace	Tall	Year 'round
	10 week		
	Oregon	Short	Year 'round
	Ice Follies — BGA	Tall	Oct. thru May
	Little America	Tall	Sept. thru June
	Star Burst — BGA	Tall	Year 'round
	Ill. Snowdrift	Tall	Mar. thru Dec.
	Fred Shoemith	Tall	Oct. thru May
	Imp. Ind. White	Tall	Mar. thru Dec.
	Ind. #3 White	Tall	Year 'round
	11 week		
	Marketeer	Tall	Oct. and Nov.
			Nov. and Dec.
YELLOW	8 week		
	Blazing Gold	Medium	Mar. thru Sept.
	9 week		
	Yellow Lace	Tall	Year 'round
	Sunray	Tall	Apr. thru Oct.
	10 week		
	Yellow Delaware	Short	Year 'round
	Ind. Yellow	Tall	Mar. thru Dec.
	Imp. Ind. Yellow	Tall	Mar. thru Dec.
	Jack Straw — BGA	Medium	Year 'round
	Golden Princess Anne	Tall	Sept. thru May
	Yel. Princess Anne	Tall	Oct. thru May
	#2 Yellow Shoemith	Tall	Oct. thru May
	11 week		
	Bonn Deluxe	Medium	Year 'round
	Yellow Marketeer	Tall	Oct. and Nov.
			Nov. and Dec.
BRONZE & RED	10 week		
	Delaware	Short	Year 'round
	Warhawk — BGA	Short	Year 'round
	Ind. Br.	Tall	Mar. thru Nov.
	Dk. Ind. Br.	Tall	Mar. thru Nov.
	Golden Gate	Tall	Oct. thru June
	11 week		
	Calv. Gold	Medium	Oct. thru Dec.
PINK	9 week		
	Blue Ribbon	Medium	Year 'round
	10 week		
	Ind. Pk.	Tall	Oct. thru May
	Mermaid — BGA	Short	Year 'round
	Portrait	Medium	Mar. thru Nov.
	Personality	Medium	Oct. thru June
	Princess Anne	Tall	Sept. thru May
	Humdinger	Medium	Mar. thru Dec.
	Pk. Fred Shoemith	Tall	Nov. thru Apr.
	11 week		
	Ill. Formal	Tall	Oct. thru Dec.
	Calverts Pink	Medium	Oct. thru Dec.
	Vedova	Tall	Oct. thru May

YEAR ROUND POT PLANT SCHEDULE

SINGLE PINCH POT PLANT METHOD

'Mums as pot plants can be grown the year around or for any special Holiday or Season. If you are not familiar with this program, read the article on Lighting and Shading carefully and follow the selected program according to schedule, making certain to maintain the temperatures given.

Plant 5 cuttings to a 6" pot in any good soil and peat mixture, keeping them properly fed and watered. Maintain a temperature of 60-65° at night. After color shows, plants should be finished at a cooler temperature to harden them off. (Also see page 23.)

TALL, MEDIUM, AND SHORT TREATMENT PROGRAMS

Because of the difference in growth habit of the varieties used in the Pot Plant Program it has been found advisable to classify these into Tall, Medium and Short growing groups. These classifications are made and programs set up for each to allow for better control over their growing habits and should result in more uniform finished plants.

To use this Pot Schedule you must first check the variety listing on page 29 for the treatment to be used and for recommended blooming period. If the variety is classified as Medium Treatment, use the schedule as listed. If it is classified under Short or Tall Treatment then adjust schedule as outlined below.

SCHEDULE FOR — MEDIUM TREATMENT VARIETIES ONLY

(Check Page 29 for Variety treatment)

SHORT TREATMENT —

adjust by planting and pinching one week earlier, Lights Off, and or, Shading Date remains the same.

TALL TREATMENT —

adjust by planting and pinching one week later. Lights Off, and or, Shading Date remains the same.

GARDEN VARIETIES FOR SPRING POT PLANTS

In recent years there has been evidenced a rapidly increasing demand for pot plants with lasting qualities, as noted by the increased sales of Pot Mums for the Spring Holidays. This demand is being further enlarged by the use of Hardy Mums during the Spring months as they offer the additional sales appeal of being used again by the purchaser for fall blooming in the garden.

These attractive, colorful pots can best be timed for the different holidays by the use of lights and black cloth, but they also may be brought in with slightly less accuracy without the use of lights or shade. (See schedules below.)

Many growers, besides finding ready sales for the five or six inch pot, have found a nice additional Cash and Carry Market for the three inch pot (one cutting — single pinch), and for the market pack or flat of Spring Hardies, solid colors or mixed.

The cuttings should be ordered to arrive one or two weeks ahead of pinch date. For delayed start they may be planted and pinched on pinch date.

Pot and place under artificial lights upon arrival. Use 60 Watt bulbs placed four feet apart and thirty inches above the plants. It is best to light for three hours during the middle of the night. Maintain a sixty degree night temperature until buds are well developed.

GARDEN VARIETIES FOR POTS

WHITE	YELLOW	RED & BRONZE	PINK
Benora	Yel. Chris Columbus	Lipstick	Spellbound
Ostosa	Kings Ransom	Remembrance	Alert
Jess Williams	Astoria	Toronto	Ann Ladygo
Gloria	Yel. Calumet	W. P. Snyder	Mischief
Chris Columbus	Pomponette	Calumet	Major Cushion
Mitsie	Chiquita	Dk. Calumet	Joan Helen
Diamond BGA	Gay Blade BGA	Dolli-Ette	Minnpink
		Radiance	Jeweltone
		Ruby Mound	

SINGLE PINCH METHOD

EASTER — April 22	MOTHER'S DAY — May 13	MEMORIAL DAY — May 30
Plant & Light — Feb. 1 - 7	Plant & Light — Feb. 27 - Mar. 5	Plant & Light — March 12 - 19
Pinch — Feb. 26	Pinch — Mar. 19	Pinch — April 2
Lights Off — Feb. 26	Lights Off — Mar. 19	Lights Off — April 2
Shade — None	Start Shade — Apr. 2	Start Shade — April 2

*DOUBLE PINCH METHOD

Plant and light four weeks earlier and pinch one week after planting. Second pinch should be made on date given in single Pinch Method.

3" POT — NO LIGHTS NO SHADE — ONE PINCH

For Mid-May flowering the cuttings should be planted and pinched by mid March. For Late May flowering the cuttings should be planted and pinched by 1st week of April. An attempt to flower these varieties later than May 25th without shade is not recommended.

Remember that temperature of 60 degrees must be maintained.

Plunging 3" pots in soil and peat eliminates extensive watering.

GARDEN VARIETIES

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

WHITE

WHITE CUSHION Sept. 15 4.50
Low growing for border plantings. White decorative type flower with slight pink shadings in buds. Blooms earlier second year.

BENORA Sept. 20 4.38
Dwarf type growth providing large flowers on rigid stems. Spreading well shaped plant. Good for pots.

JESSAMINE WILLIAMS Sept. 25 4.50
White quilled type spoon. Vigorous early free flowering variety of medium height. Showy — 3" pot.

OSTOSA Sept. 25 4.13
An intermediate paper white pompon on a semi-dwarf plant. Early and very free flowering. One of the best whites for foreground planting.

GLORIA Sept. 25 4.50
Very free flowering Ivory White decorative pompon. Flowers are larger and more double than Chris. Columbus. Fine no light — no shade May pot variety.

CORTIS RICE Sept. 10 4.50
Large 5" buttercup yellow blooms. Perfect for accent planting, or for cut flowers for the home.

YELLOW CUSHION Sept. 15 4.38
A pleasing shade of yellow. Low growing decorative type for border plantings.

POMPONETTE Sept. 15 3.75
Low growing, intermediate golden yellow pompon. Very prolific and useful garden variety. Good for Spring Pot plants.

GOLDEN FANTASY Sept. 20 4.50
Bright golden carnation type decorative. Vigorous growing habit with an abundance of blooms on plant of medium height. A really striking variety for garden plantings.

TRANQUILITY Sept. 25 4.38
Reliable primrose yellow decorative pompon for late September. Medium height.

YELLOW SUPREME Sept. 28 3.75
Bright lemon yellow, cushion border.

KINGS RANSOM Oct. 1 4.50
Large golden yellow decorative. Vigorous growth, prolific bloomer. Good Spring pot variety.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

MT. HOOD Sept. 28 4.38
Large flowering, pure white decorative. Prolific flowering habit. Durable blooms create a garden showpiece. Partial disbudding produces 4" to 5" flowers.

CHRIS. COLUMBUS Oct. 1 4.50
A pleasing cream colored medium sized decorative pom. Very prolific in the garden. Outstanding for Spring and Fall pots. Good cut flower variety.

DIAMOND BGA Oct. 5 4.50
Intermediate white pompon. Its very dwarf, compact and spreading habit is ideally suited for spring pots. Outstanding white for NO LIGHT - NO SHADE pots and an ideal border variety for the garden.

MITSIE Oct. 5 4.38
Small round white pompon. Bushy compact growth habit with a profusion of bloom. One of the best whites for Spring pots. Improves Pepita.

HORIZON Oct. 5 3.75
Intermediate Pompon, pure white. Best cut flower variety in this early flowering period.

BLIZZARD Oct. 15 4.00
Small formal pompon, clear white. Good cut flower.

YELLOW

YELLOW CHRIS. COLUMBUS Oct. 1 4.50
Lemon yellow, intermediate decorative. One of the most popular for Spring pot plants. A good cut flower and prolific garden variety.

GAY BLADE Oct. 1 4.50
Bright yellow miniature spider. An early, dwarf cushion habit that has few equals for color and mass display value. Excellent as a NO LIGHT - NO SHADE pot and also for the fall garden.

CHIKUITA Oct. 1 4.38
Small, deep lemon yellow button pompon. Chic for Spring and Fall pots. Intermediate garden variety.

ASTORIA Oct. 5 4.50
Intermediate bright lemon yellow pompon. Improvement over Yel. Chris. Columbus or Moonlight for Spring pot plants. Early foreground variety.

CHARLES NYE Oct. 5 4.50
Large deep yellow pompon. Excellent as cut flower. Showy and prolific garden variety.

YELLOW CALUMET Oct. 10 4.50
Lemon yellow sport of Calumet. Good early cut flower May be used for Spring Pots.

SARASOTA Oct. 15 4.00
Medium bright yellow pompon. Excellent cut flower.

VARIETY	MATURES	PRICES PER 50
---------	---------	------------------

BRONZE & RED

GLOW WORM Sept. 10 4.00
Semi-double cushion, for border planting. Orange Scarlet.

TORONTO Sept. 20 4.50
Pleasing bronze decorative. Prolific bloomer with short growth habit. Outstanding for pots and borders.

SCARLET CRIMSON Sept. 20 3.88
Decorative type, bright red pompon. Medium height for secondary border in gardens.

CAMPAIGNER Sept. 22 4.50
Beautiful, large flowering, bronze gold blooms. Medium in height, upright growth habit. Striking Fall tone. Dis-budding effective.

RUBY MOUND Sept. 22 4.50
A new and exceptionally attractive bright ruby red with cushion type growth. Resists fading. Rivals Lipstick as Spring Pot plant or in the Garden where it blooms a week earlier.

FLAMBOYANT Sept. 25 4.00
Decorative, secondary border and cut flower. Stately and lively, flaming orange bronze.

CHAMPION CUSHION Sept. 25 4.50
Deep bronze decorative type pompon. Borders or Spring pots.

COMMANDER CUSHION Sept. 25 4.50
Decorative type, red pompon. Borders or Spring pots.

REMEMBRANCE Sept. 28 4.50
Large decorative, deep carmine. For pots and secondary borders in the garden.

LIPSTICK Sept. 28 4.50
Attractive ruby colored Cushion pompon. Borders and Spring pots.

W. P. SNYDER Oct. 1 4.25
Intermediate decorative. Bright apricot color, useful for garden and Spring pots. Medium height.

HUNTSMAN Oct. 5 4.13
Scarlet orange decorative. Excellent garden cut flower, showy and dependable. Tall grower.

DOLLI-ETTE Oct. 10 4.50
Striking golden bronze and red spoon. Sure fire variety for pots or garden.

CARNIVAL Oct. 10 4.50
Large pompon. Glowing burnt orange. Good cut flower and background garden variety.

CALUMET Oct. 10 4.50
Large decorative, brilliant apricot. Excellent as garden variety and for Spring pots.

DARK CALUMET Oct. 15 4.50
Dark bronze sport of Calumet. Fine color for Fall.

RAJAH Oct. 15 4.50
Intermediate single, rich red. Background and cut flower.

RADIANCE Oct. 15 4.50
Intermediate decorative, non-fading red. Good for pots and garden work. Prolific and free breaking.

PINK

JOAN HELEN Sept. 10 3.75
Intermediate pompon, deep purple. A brilliant garden variety. Exceptionally good as pot plant.

ALERT Sept. 20 4.50
Large decorative dark purple pompon produced on well shaped plants. Flower more durable than Purple Waters. Especially good for Spring pots.

MINNPINK Sept. 25 4.50
Lovely rose pink cushion. Very compact with a profusion of bloom. Improvement on Major Cushion in color and form. Good habit for Spring pots and border plantings.

LOVELINESS Sept. 25 4.38
Carmine pink spoon with outstanding flower quality. Provides that something different for garden sales.

MAJOR CUSHION Sept. 25 4.50
Decorative type lavender pompon. Good border variety and useful for Spring pot plants.

MISCHIEF Oct. 1 4.50
Dark purple single with contrasting yellow center. Pro-

fuse flowering and attractive as border variety or for Spring pot plants.

JEWELTONE Oct. 1 4.50
Small rose pink pompon. A much brighter, more colorful version of Joybringer. It is also more prolific. Responds well in NO LIGHT - NO SHADE spring pot programs, and is an excellent fall garden variety.

SPELLBOUND Oct. 1 4.50
Intermediate decorative, pleasing lavender shade. Ideal as Spring pot plant. Height medium.

ANN LADYGO Oct. 5 4.38
Medium pink anemone. Cushion type growth. One of the loveliest garden specimens to date. When in full flower the foliage is completely covered by beautiful pink anemones. The most exciting new Spring pot available.

ACCOLADE Oct. 15 4.50
Intermediate, Carnation pink decorative. Nice spray formation on good stem.

ENTERPRISE Oct. 15 4.25
Large Amaranth rose pompon. Stately growth habit.

Early Order Discount does not apply on Collections.

COLLECTION #1 — All cut flower varieties.

COLLECTION #2 — Cushion or border varieties.

COLLECTION #3 — Cut-flower and border varieties.

COLLECTION #4 — Varieties for Spring Pots.

LIGHTING REQUIREMENTS FOR GARDEN VARIETIES

Garden varieties for normal Fall Flowering may be planted directly to cold frames or fields in the month of May. However, many growers desire to start them in May in heated greenhouses. When this is done it is necessary to light the cuttings until the first of June to avoid premature bud development and the loss of vegetative growth.

PINCHING SCHEDULE FOR GARDEN CHRYSANTHEMUMS

Natural Flowering Date	Last Pinch Date for Cut Flowers	Last Pinch Date For Border Plants
Sept. 1	June 17	July 10-15
Sept. 15	June 24	July 15-20

BGA VARIETIES NOW AVAILABLE

In our continuing effort to serve our customers with all of the latest developments in our industry we wish to announce that Stafford Conservatories, Inc. has been granted license by Yoder Brothers, Inc., of Barberton, Ohio, to propagate for resale, varieties that in the past have been restricted under their Grower Agreement Contracts.

These varieties, formerly issued under Yoder Grower Agreement, are now offered to the trade thru licensed growers as Breeder Grower Agreement Varieties.

With our licensing we are now able to supply your requirements for many of these recent introductions. However, before we can ship any BGA variety we must have in our office a signed agreement by the purchaser. This agreement once signed entitles you to purchase any of the BGA varieties we offer.

For those not familiar with the Grower Agreement it is an agreement whereby the purchaser agrees to certain conditions set down by the originator of the seedling. The two main considerations are that the purchaser (unless licensed) may not propagate to sell, loan, give, or otherwise dispose of any stock of such varieties: and secondly, that all sports or mutations that may appear in varieties covered by this agreement are the property of the originator, and are to be reported immediately. These and other details are set forth in the formal agreement.

Please note, that even though you may have signed this agreement with Yoder Brothers, we must secure a signed agreement for our office. If you so desire you may now request that we forward copies of the agreement forms for your signature to have them on file and thereby expedite orders for future delivery.

We have at this time restricted our plantings for commercial production to the following, which we consider to be some of the better varieties.

POTS	Diamond	CUT FLOWER	Dawn Star
	Ice Follies		PingPong
	Starburst		Divinity
	Gay Blade		Starburst
	Jackstraw		Jupiter
	Warhawk		Jackstraw
	Mermaid		Shane

We are starting trial propagations on many other BGA varieties which will be available during the year. If then, there is a BGA variety not listed in this catalogue which you desire, we will most likely be able to meet your requirements if given sufficient notice.

Should you have any questions regarding this please feel free to call us.
